To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:</p> <p>a) <input checked="" type="checkbox"/> The period for reply expires <u>3</u> months from the mailing date of the final rejection.</p> <p>b) <input type="checkbox"/> The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than <u>SIX MONTHS</u> from the mailing date of the final rejection.</p> <p>Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).</p> <p>Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p> <p>NOTICE OF APPEAL</p> <p>2. <input type="checkbox"/> The reply was filed after the date of filing a Notice of Appeal, but prior to the date of filing an appeal brief. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).</p> <p>AMENDMENTS</p> <p>3. <input type="checkbox"/> The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because</p> <p>(a) <input type="checkbox"/> They raise new issues that would require further consideration and/or search (see NOTE below);</p> <p>(b) <input type="checkbox"/> They raise the issue of new matter (see NOTE below);</p> <p>(c) <input type="checkbox"/> They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or</p> <p>(d) <input type="checkbox"/> They present additional claims without canceling a corresponding number of finally rejected claims.</p> <p>NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).</p> <p>4. <input type="checkbox"/> The amendments are not in compliance with 37 CFR 1.121. Continuation of 11. does NOT place the application in condition for allowance because: Applicant has argued that Swoboda does not teach making up or breaking out a tubular joint at a well center; the examiner notes that she has not indicated that Swoboda does teach this feature as Kelly clearly teaches a tong. Swoboda has been used merely to teach the use of a cantilevered and extendable boom used with a wellbore tool. Applicant also argues that no motivation to combine Kelly and Swoboda has been provided and the examiner has used hindsight to make the rejection. The examiner notes that specific motivation from Swoboda was provided where in column 1, lines 56-68 and column 2, lines 6-10, Swoboda states why a cantilevered and extendable boom to move a wellbore tool around a rig floor is advantageous over an apparatus to move the tool in a signal plane such as that taught by Kelly. Applicant has argued that there is not indication in Kelly that extension or retraction of the tong would serve any purpose and actually specifically indicates that the desired feature of moving the tong to and from a position aligned with the wellbore is fully achieved by the claimed invention. The examiner notes that applicant is arguing as if Kelly had been applied under 35 USC 102 and further notes that Swoboda was used to teach the extension and retraction of the wellbore tool feature. Further, the mere fact that Kelly indicates that the disclosed invention works is not an indication that combining other features with the disclosed apparatus would not be obvious to one of ordinary skill in the art.
